

## REMOTELY MONITOR & MANAGE ENERGY USAGE ACROSS MULTIPLE SITES IN REAL-TIME

Process Measurement Company and DENT Instruments have introduced an advanced remote energy monitoring solution with the ability to easily compare energy usage and control costs across multiple sites. Whether you are running a manufacturing facility, data center, or a commercial building, this monitoring tool is compatible with all single-phase and three-phase DENT PowerScout models for a low monthly subscription fee.

## MANAGE ENERGY USAGE & CONTROL COSTS

### APPLICATIONS

- Data Center Monitoring
- Tenant Submetering
- Bi-Directional Metering
- Real-Time Power Monitoring in Commercial, Retail, and Industrial Facilities
- Revenue grade ANSI C12.20-2010 Class 0.2
- Peak Demand Response
- Predictive Maintenance
- Easy, Safe Installation and Configuration
- UL Listed (enclosure version) or UL Recognized (circuit board version only)

**CONTACT PMC TO GET STARTED TODAY!**

### FEATURES

- Web access to live data including voltage, current power, energy, and many other electrical parameters on single-phase and three-phase systems
- High level web dashboard showing status of multiple sites, lines, machines, tenants, and more
- Drill down to individual meters
- Daily usage reports
- Reports for a selected range of dates
- User management
- Configurable email and text alerts
- Custom dashboards
- Custom reports
- Smart phone app for iOS and Android
- Private branding
- Custom integration with other software platforms (maintenance, billing, ERP, etc.)
