

Process Measurement Company provides professional-grade industrial test and measurement equipment with flexible rental periods, same-day shipping and technical support to meet our customers' critical needs. Companies interested in equipment for short-term or long-term projects will benefit from PMC's extensive equipment offerings from industry-leading suppliers. With expert support, knowledge of code compliance and rent-to-own options, PMC provides the solutions you need.

Power Meters & Load Demand Equipment

Power meters and load demand equipment, including the DENT ElitePro XC Energy Logger, help those performing energy audits, "peak load" demand studies, or 30-day load studies in accordance with NEC, better understand their electrical usage and performance metrics.

Power Quality Analyzers

Perform power quality surveys to detect transients, harmonic noise and capture waveforms. Run preventative and predictive maintenance testing with PMC's line of power quality analyzers from Dranetz, Fluke and more.

Thermal Imagers

For applications ranging from simple energy audits to advanced heat loss R&D, our extensive line of Flir and Fluke thermal imagers meet the full spectrum of needs.

Megohmmeters

Insulation resistance testing equipment available for AC and DC applications is available for rent through PMC from Megger, Fluke, HVI, Slaughter/SCI, and more. Low-voltage and high-voltage testing equipment checks cable health and safety and identifies any potential weak points or breaks in cable insulation.

Hipot Testing

PMC offers hipot test equipment for dielectric withstand tests and very low frequency hipot testing. Perform these tests for cable, wired assemblies, printed circuit boards, electric motors windings and transformers.

Micro-ohmmeters & DLROs

With current range of 0.5 mA to 100 amps, PMC carries both Digital Micro-ohmmeters and DLROs to measure contact resistance of switch and circuit breakers, aircraft frame bonds, and rail and pipeline bonds.

3M DYNATEL™
Pipe, cable and fault locator

VLF (very low frequency) AC hipot testers and DC hipot testers

Wire tracers, insulation testers, micro-ohmmeters and clamp-on ground resistance testers

Multimeters and electrical, clamp-on and environmental testers

Insulation resistance testers, DLROs, ground fault locators, power quality testers and more

Clamp meters, digital multimeters, electrical testers, environmental testers, insulation and ground resistance testers

Thermal imaging, diagnostic and measurement sensing solutions

Calibrators, digital manometers and manometers

Data loggers, power meters, energy recorders and revenue grade current transformers

Insulation testers, power load and power quality metering equipment, thermal imaging, multimeters, clamp meters and more

High quality electrical measuring instruments including insulation testers

Intelligent power quality and demand solutions including portable and permanent power quality analyzers, software and accessories

Ground fault locating equipment

Hipot testers, ground bond testers, multi-function testers, insulation resistance testers and leakage current testers
